

Sunmu Jung

Combat & Systems Designer

(949) 878-5574 · sunjung3145@gmail.com · Irvine, CA Portfolio URL: <https://sunmu0320blizzard.wixsite.com/my-site>

Game designer focused on combat systems, base-defense mechanics, player progression, and RPG-inspired gameplay loops in Unity and Unreal Engine 5. Experienced in designing playable prototypes, tuning encounter pacing, building resource-driven systems, and iterating mechanics through playtesting and clear documentation. Strong at connecting gameplay feel, system rules, and player decision-making from prototype to polish.

Projects

Solo Project - Cute Carnage (Unity Survival Base Defense)

March 2026 - Present

- Designing and developing a 3D top-down survival base-defense prototype in Unity built around a day/night loop of scavenging, base preparation, and nighttime zombie defense.
- Designed core survival systems including resource collection, hunger management, fence repair, tower construction, base persistence, and zombie attack behavior.
- Built modular base-defense mechanics using fixed fence and tower slots, resource costs, HP values, repair rules, and upgrade-ready interaction structures.
- Tuned combat readability and enemy pressure by iterating zombie targeting logic, obstacle priorities, tower behavior, and player auto-combat feedback.
- Used AI-assisted development workflows to accelerate implementation planning, debugging, and refactoring while maintaining ownership of design decisions, Unity integration, and gameplay testing.

Game Designer - Japanese Salaryman

January 2025 - Present

- Designed three office-themed minigames with defined core loops, player objectives, win/lose states, UI layouts, pacing goals, and balancing values.
- Created design documentation outlining minigame rules, interaction flow, tutorial needs, feedback states, and player experience goals.
- Collaborated with a programmer to convert design concepts into playable Unity prototypes for rapid iteration and mechanics validation.
- Coordinated playtests through UCI VGDC and internal sessions to evaluate tutorial clarity, usability, pacing, feature balance, and player comprehension.

Game Designer / Lead Artist - Dungeons and Anteaters (DNA)

March 2024 - December 2024

- Designed combat and encounter pacing for a 2D action RPG, tuning difficulty, enemy flow, learning curve, and combat rhythm.
- Iterated combat mechanics through internal playtests, improving attack timing, hit clarity, enemy behavior, feedback readability, and engagement.
- Designed main character movement and attack animation sets to support responsive combat readability and a distinct gameplay feel.
- Collaborated with programming and art teams to align gameplay goals, visual direction, enemy encounters, and implementation priorities.

Education

[University of California, Irvine]

Bachelor of Science in Game Design and Interactive Media

SKILLS

Technical Skills

- | | |
|---|---|
| <ul style="list-style-type: none">• Programming/Scripting: C#, Python, Unreal Blueprints• Game Engines: Unity, Unreal Engine 5• Tools: JIRA, Slack, GitHub, Perforce, Visual Studio | <ul style="list-style-type: none">• QA & Design: Playtesting, bug reporting, gameplay tuning, combat feedback, encounter pacing, documentation• Art/Animation Tools: Blender, Aseprite• Language: English, Korean |

LEADERSHIP EXPERIENCE

Founder/President, United Korean American Leaders Club (UKAL)

- Structured and led the organization, made up of over 50 members and leaders, through trainings, weekly meetings, and communication workflows.
- Organized and hosted events to create awareness and raise \$2000+ in funds for organizations, including fundraisers, orientations, clubbing events, gathering events, freshman welcoming events, and more.
- Drafted and led discussions to create the organization's code of conduct and leadership structures, leading to 22 leaders and members
- Reached out to outside organizations from other universities or businesses, such as local restaurants, UKV, KASA, Ottogi, Weee, and more, for collaborations and extensions of events
